Mini PC is a portable PC that you can carry anywhere you go. It looks like a USB dongle that you can fit into your pocket. The Mini PC runs on the Android OS and if you connect it with any device such as a monitor you can convert them into an Android PC. But the purpose for which Mini PC is being used mostly is for creating entertainment on television. By plugging the device into the television, you can access on-demand streaming apps as you do on your mobile phone or computer. The Mini PC supports Wifi so you can easily connect it either from a wifi router or from your mobile phone.
