Android 10

First to support Google 's new system Android 10, and greatly optimized for the system, can support a minimum of 1GB of memory

feature \ IOS	Android 10
Fluency	The system natively supports Vulkan 3D technology. Android 10 UI preferentially uses Vulkan for drawing, which has higher efficiency and lower load.
Safety	File encryption technology based on Google Adiantum algorithm, enabled by default to avoid data leakage caused by Flash
Stability	Smarter background memory management technology (LMKD-PSI), small memory application, faster killing process, foreground process is less affected by background process
Running speed	Virtual machine code optimization to improve execution efficiency
Memory space	New dynamic partitioning technology, flexible allocation of Flash partitions, saving storage space
